

A large photograph showing several rolls of blue, translucent plastic tubing. The rolls are stacked and slightly overlapping, with the ends of the tubes visible. The background is a dark, textured blue surface.

Custom tubing to your exact specifications.

Unique tubing solutions are what Sunlite Plastics has delivered for seven decades. From extrusion to packaging options, we deliver in the manner that makes it easy to handle, saving time and money along the way. Our facilities ensure we're ready to meet high-volume tubing demands and deliver it in the manner that best integrates with your operations. Trust Sunlite to deliver on time, and on budget.

SunlitePlastics.com | 262.253.0600

ISO 13485 Certified

What you can visualize, we can create.

We've extruded hundreds of millions of feet of medical tubing for all types of devices and uses. So if you don't see what you're looking for here, just ask—mostly likely we can manufacture exactly what you need. In-house PVC raw material compounding combined with closed-loop extrusion capabilities enable us to offer cost efficient, high quality solutions delivered in the manner best suited for your production processes.
